Making it Real - iPads in the Classroom

Sessions will be built around a model which will assure participants will leave the session not only with theory, but having had the opportunity to practice skills independently and create something of real use to their students and to themselves!

Here are just a few of this year’s sessions:

- Leveraging Play to Learn
- Improving Early Literacy with iPads
- Integrating STEM and STEAM into the Classroom
- Online Portfolios With Seesaw
- You Two Boys Play Nice: Reconciling Google Apps and the iPad

PLUS… an outstanding 1st grade teacher and Apple Distinguished Educator, keynote speaker and session presenter, Ryan Wiggins, from Bend, OR!
